WORLD'S LEADING AUTOMOTIVE
COMPOSITES FORUM

Click here to type Title of Poster in this Section

(use both Upper & lower letters & try not to exceed 3 lines – you can reduce font size slightly to get it to fit)

Delete text & drop in Author 1 photo

Delete text & drop in Author 2 photo

Delete text & drop in Author 3 photo

Delete text & drop in Author 4 photo

Delete text & drop in Author 5 photo

Author 1, Author 2, Author 3, Author 4,
University & Department

(delete photo boxes if fewer authors are involved)

This section holds your abstract. Make it short & concise so it pops out for judges to review. What were your goals & what did you learn?

Your text describing your overall research program goes in these 3 columns. Basic text is set for Calibri 15 pt. Head1 is set to Calibri 15 pt Bold and Head2 is set to Calibri 15 pt italics. If you don't have that font loaded, use another san-serif font like Arial or Helvetica.

To start, just click on the first paragraph to highlight it (or start typing just in front of the first line) and keep typing. Alternatively, you can try cutting and pasting type from another document into these text boxes, but make sure you reformat the type properly afterward.

Head1

Head2

To continue writing in the next column, just click on the text here and start typing, hitting a carriage return to get to the next line.

It's good to make sure you state your project goals, your experimental setup, materials tested, how you conducted your experiments, any special changes you needed to make, and results. You'll list your summary/conclusions and next steps in the box at the bottom of the poster.

By the time you get to this column, you should start showing your results. Try to keep your tables and graphs near the paragraph in which they are mentioned if all possible. That makes it easier for someone reading the poster to understand where the supporting graphs are.

Do the best you can. We'll fix whatever doesn't look right.

Graphs or images go in the box above. Put captions to describe your images here. If you use a table, move this red band containing your caption above the table. Captions go under photos or graphs. If you move your image & caption box, be sure to copy your text box so your type shows. By the way, text won't word-wrap around images, so you might as well try to have them span the column width.

In this last section, you will type your summary & conclusions, plus next steps. Try not to exceed 4 lines, so be concise. You can make type slightly smaller to fit but please don't make it too small. We want your conclusions to pop out to judges.
